Subject: Preview Reports Available

Good morning,

If you have a CheckPoint Login: please check your hospital's Preview Reports to ensure that the measure data looks correct for your hospital(s).

The CheckPoint Preview Report has been updated to show your hospital's data for the for the following measures. This new data will be released to the **public reports on 5/22/2023**.

- **All-Cause Readmissions (ACR):** 2021Q4 – 2022Q3 - in the Readmissions measure family section.
- **Falls with Major Injury:** 2022Q1 – 2022Q4 - in the Patient Safety – All Patients measure family section.
- **AHRQ Patient Safety Indicators (PSIs):** 2022Q1 – 2022Q4 - in the Patient Safety – All Patients and Patient Safety – Patients with Surgery measure family sections.
- **AHRQ Mortality Measures (IQIs):** 2022Q1 – 2022Q4 - in the Mortality - Conditions and Mortality-Procedures measure family sections.

You may view the Preview Report by clicking on the **Hospital Login** option on the orange menu bar, signing-in, then clicking **Preview Report**, selecting a hospital. You can either click [See All Measures](#) and scroll to the appropriate measure family or open a single family by clicking its name.

The AHRQ and All-Cause Readmissions results are reported as risk adjusted rates and exclude COVID patients from the calculations. Hospitals' results may differ from a rate calculated directly from the numerator and denominator. The risk adjustment method applied to the All-Cause Readmission results is described under **Resources > For Hospitals > Risk Adjustment Method**. The Preview Report provides confidence intervals to validate the star ratings, which are awarded as described under **Resources > For Hospitals > CheckPoint Star Rating**.

Thank you,
Amber
