

Resource Spotlight: WHA Information Center Charge Analyzer

Did you know about the Charge Analyzer Dashboard located behind the WHA member portal? This member-only dashboard is a great tool for users to “drill down” from service line selection to individual charge analysis. Line-item charges can be compared to a self-selected peer or peer group. Additional data in the tool helps put the charges into context, including information on volumes, average age of the patient, payor mix, and percent variance from peer or peer group.

Only chief executive officers or chief financial officers can request access to this tool by sending an email to WHA Information Center Operations Director [Brian Competente](#). Once access is granted, the Charge Analyzer can be found behind the member login on the WHA home page behind the “Resources” tab.

Contact [Brian Competente](#) if you have any questions regarding the dashboard.
