Register Today for a Complimentary Webinar on the Impacts to Wisconsin Hospitals on Rising Claims; Strategies for Leaders

Webinar scheduled for June 23

WHA members are invited to register for a complimentary webinar, "Rising Claims, Real Impacts: Wisconsin Hospital Risk Trends and What Leaders Can Do Now," on Tuesday, June 23, from 9-10 a.m.

Wisconsin hospitals are facing evolving medical malpractice, workers' compensation and general liability claim trends, many driven by systemic pressures rather than isolated incidents. Understanding what's actually driving losses is critical to controlling the long-term cost of risk and protecting organizational stability. In this webinar, participants will examine Wisconsin-specific claims data and emerging patterns shaping hospital risk profiles today.

Attendees will gain insight into common root causes behind costly claims, where traditional prevention efforts may fall short and how data-driven analytics can be leveraged to reduce claim frequency, severity and total cost of risk (TCOR) over time.

This webinar will be especially valuable for risk management, finance, legal and executive leaders seeking practical strategies to better align safety, operations and insurance outcomes in a tightening risk environment.
